

Children's Dentistry.

We all know that first impressions can last a lifetime. Whether your child has been to a dentist previously or is coming to our office for their first dental visit, Dr. Phelan and his team will go the extra mile to make sure that first visit to our office is a very special one. We have an excellent new children's area in the reception room with a flat screen TV and Playstation 3 with child friendly games and DVD's. We are also having a fabulous salt-water aquarium custom built for our reception room with many colorful and exotic fish for your children to look at and enjoy. Each of our treatment rooms is equipped with satellite TV so your child can have some of their favorite programs playing during their visit to help them feel more comfortable in the dental chair.

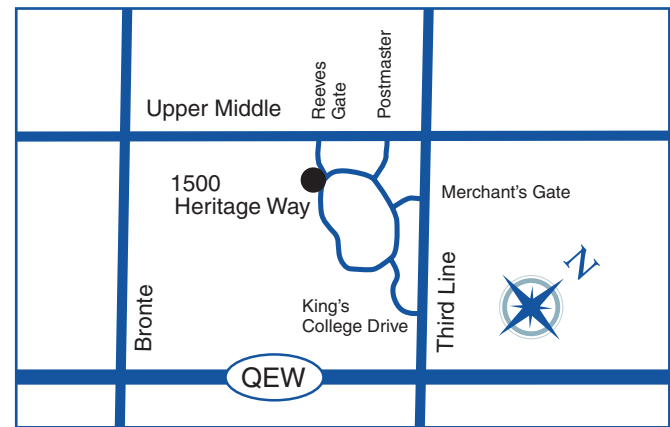

Dr. Phelan has recently invested in a dental laser that can treat cavities in children's teeth without the drilling sound or vibration. The Laser treatment can lead to a decrease in the amount of anesthetic that is required during the visit to treat the cavity and improve the overall experience for your child.

If you have any questions about your children's dental health, or to schedule an appointment, feel free to call our office at 905-827-1619.

About Dr. Stephen Phelan

Dr. Stephen Phelan graduated in 1992 from The University of Toronto, Faculty of Dentistry and has been in private practice in Oakville since August of that year. The main focus of Dr. Phelan's practice has been aesthetic, restorative and implant dentistry. He is very pleased to be welcoming and treating children in the office as well. Dr. Phelan is the author of numerous published articles on techniques in cosmetic dentistry and has lectured locally and internationally on this subject. Dr. Stephen Phelan lives in Oakville with his wife Melissa and young daughter Kyleigh and he has been a sponsor for numerous local community charities, fundraisers and a variety of minor sports teams.

It's About Making You Smile.

Celebrating Our 15 year Anniversary. 1992 - 2007

New Patients Welcome!

Dear Neighbour,

If you are looking for a new dental office, I would like to welcome you to consider my practice. My office has developed a number of amenities designed to make you and your family feel as comfortable as possible during your time with us. Some of these amenities include satellite televisions in each of the treatment rooms so you can watch your favorite programs or you can listen to music on an IPOD with BOSE noise cancelling headphones. We also have the fabulous, new IQUITI Digital Video Personal Eyewear glasses that allow you to watch DVDs on a virtual large screen TV. We have developed a number of special amenities that have been specifically added for your children's comfort and you can read about these in the children's section of this brochure. I am very fortunate to have a caring and friendly team who are totally committed to your overall oral health and will make you feel welcomed and respected. If you have any questions about our office, please feel free to call us at 905-827-1619. We look forward to meeting with you and creating a long-term relationship.

Sincerely,

Dr. Stephen Phelan

Laser Dentistry.

Dr. Stephen Phelan is very pleased to announce that our practice has just acquired an amazing new device that utilizes the latest dental laser technology. What does this laser do? It performs a variety of dental procedures, including cavity preparation, caries (or decay) removal, and a wide range of soft tissue (gum) procedures. How does it work? The system uses laser-energized water and it significantly improves your comfort in the dentist's chair, causing no heat or vibration in your mouth, no drilling noises, and no over-heating of your teeth. Remarkably, it also treats soft tissue gently and efficiently. With this technology, many dental procedures can be performed with no pain, virtually eliminating the need for anesthesia in most cases. The laser is very precise, so we can leave behind as much healthy tooth structure as possible. It also performs numerous soft tissue (gum) procedures with little or no bleeding. We are extremely proud to be able to offer this new technology for all of our patients. Please ask us about it at your next appointment!

Implant Dentistry.

There is no need to suffer from tooth loss! Dr. Stephen Phelan can restore your smile, dental function and confidence with dental implants. Dental implants can make it possible for you to look better, feel healthier and enjoy eating again. Whether you are missing one tooth, many teeth, or all of your teeth, dental implants are often the preferred method of tooth replacement. There are many reasons for losing your teeth, including cavities, gum disease, bite problems, fractured roots, and accidents. When you loose your teeth the bone that surrounds and supports the tooth root deteriorates and melts away in a process similar to the atrophy that occurs in muscles from a lack of use. If you loose a tooth at the front of your mouth the result can be a visible defect in the bone and gums that is difficult to hide and will affect the appearance of your smile. The dental implant replaces the missing tooth root and preserves the remaining bone. Dental implants will make it possible to smile again with confidence and enhance your overall quality of life. If you would like to schedule a free dental implant consultation appointment with Dr. Stephen Phelan, please call our office at 905.827.1619.

Actual Patient Treatments by Dr. Stephen Phelan

Cosmetic Dentistry.

Dr. Stephen Phelan has dedicated much of his career to cosmetic dentistry and teaches seminars on many cosmetic techniques to dentists across Canada and the United States. Dr. Phelan feels that the first step in creating a great smile and any new patient relationship is clear communication. With this in mind Dr. Phelan will spend time with you in our consultation area discussing any concerns you may have about your smile and dental health as well as your goals for the future. Dr. Phelan feels it is best to get to know the person before he gets to know your teeth. Creating a beautiful and lasting smile requires time, skill and effort. No two people are alike and no two smiles are alike. Our goal is to create a smile that is unique and individual for you, that will look great now and for many years to come. We would like to create a smile that expresses your own unique personality and is well suited to your individual facial form. If you would like to schedule a FREE cosmetic consultation appointment with Dr. Stephen Phelan, please call our office at 905.827.1619.
